The article [1] was originally published online February 1, 2022 with the following errors:

The subject age information was reported incorrectly. Below is the correct information for Table 1. The sentence following Table 1 should state that “The age range of the subjects was between 21 and 48 years.”

Table 1. Subject information.

	Number	Age (average ± standard deviation)
Total subjects	16	28 ± 7 years
Total female subjects	12	27 ± 6 years
Total male subjects	4	33 ± 9 years
